## PROJECT EXPERIENCE

---

### Personal Project

#### *Full Stack Developer*

- Developed The Quizzler, a React-based quiz app simulating exam-like behavior by delaying result visibility until submission.
- Implemented navigation between questions with preserved answers, demonstrating state management, component design, and controlled user flow.
- Built CountryInfo Weather App using React and REST APIs, integrating REST Countries API and OpenWeather API for real-time weather and geographical info.
- Designed fully responsive and clean UI with modular component structure and asynchronous data fetching.
- Developed a user-friendly roommate matching platform utilizing React and Node.js, increasing student engagement by 40% within the first six months of launch.
- Optimized database queries and server response times, decreasing load times by 50%, which enhanced overall user experience for over 10,000 active students.

#### *Full Stack Developer*

- Developed The Quizzler, a React-based quiz app simulating exam-like behavior by delaying result visibility until submission.
- Implemented navigation between questions with preserved answers, demonstrating state management, component design, and controlled user flow.

### Squad Hackathon 2.0

#### *Full Stack Developer*

- Built TrackIt, an expense tracking app (MERN stack) during Squad Hackathon 2.0.
- Implemented authentication system, transaction storage, and analytics for real-time expense tracking and spending analysis.

#### *Full Stack Developer*

- Built TrackIt, an expense tracking app (MERN stack) during Squad Hackathon 2.0.
- Implemented authentication system, transaction storage, and analytics for real-time expense tracking and spending analysis.

## SKILLS & INTERESTS

---

**Skills:** JavaScript (ES6+), HTML5, CSS3, React, Tailwind CSS, Axios, Node.js, Express.js, REST APIs, MongoDB, Mongoose, Git, GitHub, Postman, Vercel, Netlify, Linux (Pop!\_OS), TypeScript (learning), CI/CD (learning), Testing with Jest and Supertest (learning)

**Interests:** Remote internship or junior full stack developer roles, contributing to open source projects, collaborations focused on tech-for-good initiatives

## EDUCATION

---

### University of Helsinki (Online Course)

*Full Stack Open 2025 (in progress)*

*Graduation Date: Jul 2025*

### [University of Benin]

*Bachelor's Degree in Computer Science Education (in progress)*

**Benin, Edo state**

*Graduation Date: Jan 2027*
